CARLOS ANDRÉS CÁCERES CAMPO FULLSTACK DEVELOPER

DESCRIPTION

Systems Engineering graduate from Universidad del Valle with over two years of experience in Full-Stack application development and application support. I focus on building efficient, results-oriented technological solutions by applying best practices and analytical thinking. I have experience in requirements gathering, scope definition, and communication between technical and non-technical teams. I have participated in ticket creation, client needs analysis, and solution design. My experience includes API integrations, incident resolution, and working with technologies such as C#, JavaScript, PHP, TypeScript, Java, and Angular.

EXPERIENCE

Software Developer (Mid-Level) – Dev.pro, North Carolina, EEUU | 2024 – (Present)

- Develop and maintain integrations with APIs and third-party services using Node.js, PHP, .NET, Java, and databases such as MongoDB and Oracle.
- Implement cloud-based solutions using Azure and AWS.
- Resolve support tickets by analyzing incidents and proposing solutions to ensure system continuity.
- Gather requirements based on functional needs, creating clear and detailed technical tickets, and translating business needs into technical solutions.

Achievement : Optimized the performance of multiple endpoints, reducing response times from 5 seconds to between 500 ms and 1 second by reorganizing database structures and parallelizing processes.

Freelance Web Developer – Suncoast Interactive, Florida, EEUU | 2025 – 2025

- Developed applications using Next.js, PostgreSQL, and Supabase.
- Used AI tools such as Claude and GitHub Copilot to accelerate development.
- Gathered requirements directly from clients, transforming ideas into viable technical solutions.
- Performed scope analysis, time estimation, and supported cost definition.
- Designed workflows and communicated solutions to non-technical stakeholders.

Achievement: Improved ticket creation and scope definition processes, enabling the team to have clearer requirements from the beginning of each development.

Web Administrator – Universidad del valle, Cali, Colombia | 2019 – 2023

- Managed and maintained websites using HTML5, CSS, and JavaScript, ensuring a smooth user experience and optimal performance.
- Handled content and configurations on Joomla-based websites, improving site functionality and user engagement.
- Performed regular updates and troubleshooting to maintain website security and performance, addressing issues promptly to minimize downtime.
- Collaborated with non-technical teams to understand needs and translate them into functional improvements.

Achievement: Proposed and developed new responsive designs for multiple websites of the Electronic Engineering, Electrical Engineering, and Technology programs, working closely with the communications team to properly integrate them into the institutional site.

EDUCATION

Universidad del Valle – Systems Engineering Degree

SENA – Software Development Technician

SKILLS

Programming Languages	Frameworks	Databases	Other Tools	Languages
• JavaScript • TypeScript • Java • Php • C# • Python	• NextJs • .NET • Angular • NestJS • Spring Boot • Express	• PostgreSQL • MySQL • MongoDB • FireStore	• Figma • GIT • Docker • Jira	• Inglés : English: Proficient (C2) – EF SET Certificate - link • Spanish: Native
