CARLOS ANDRÉS
CÁCERES CAMPO
SOFTWARE ENGINEER

DESCRIPTION

Systems Engineering graduate from Universidad del Valle with 5+ years of experience in software development, including nearly 3 years as a Full-Stack Developer building scalable web applications with JavaScript, TypeScript, C#, Java, and PHP. Currently working as a Requirements Engineer on a financial-sector project, handling requirements elicitation, functional documentation, and functional and API testing with Azure DevOps and Postman. This lets me connect business needs with technical implementation from the start. Experienced in REST API integrations, microservices, cloud solutions (Azure, AWS), database management, and performance optimization.

EXPERIENCE

Requirements Engineer – VortexBird, Cali, Colombia | Jul 2026 – Present

Assigned to a leading Colombian financial institution.

- Elicit functional and non-functional requirements through meetings and interviews with business stakeholders.
- Document requirements, user stories, and acceptance criteria in Azure DevOps.
- Design and execute functional and API test cases with Postman to validate deliveries.
- Build requirements and test tracking matrices in Excel to report progress and coverage to project leads.
- Bridge business and development teams, leveraging my development background to ensure technical feasibility.

Achievement: Structured the requirements and test traceability in Azure DevOps, giving the team clear visibility of test coverage and status, and detecting gaps before development begins.

Software Developer (Mid-Level) – Dev.pro, North Carolina, USA | 2024 – Jun 2026

Assigned to a U.S. insurance brokerage firm – payroll management application.

- Developed and maintained features and third-party API integrations for a payroll management platform using Node.js, PHP, .NET, Java, MongoDB, and Oracle.
- Implemented cloud-based solutions using Azure and AWS.
- Resolved support tickets by analyzing incidents and proposing solutions to ensure system continuity.
- Gathered requirements and translated business needs into clear, detailed technical tickets.

Achievement: Optimized the performance of multiple endpoints, reducing response times from 5 seconds to between 500 ms and 1 second by reorganizing database structures and parallelizing processes.

Freelance Web Developer – Suncoast Interactive, Florida, USA | 2025

- Developed applications with Next.js, PostgreSQL, and Supabase, accelerated with Claude and GitHub Copilot.
- Gathered client requirements, performed scope analysis and time estimation, and supported cost definition.
- Designed workflows and communicated solutions to non-technical stakeholders.

Achievement: Improved ticket creation and scope definition processes, enabling the team to have clearer requirements from the beginning of each development.

Software Development Intern – Copservir, Colombia (Remote) | Sep 2023 – Mar 2024

- Built and improved core modules using PHP (Yii2), Angular, jQuery, and Bootstrap.
- Managed MySQL databases and Linux servers within a Scrum team.

Achievement: Contributed to the development of new microservices with NestJS and MongoDB, delivering functional modules that were integrated into production within Scrum sprints.

Web Administrator – Universidad del Valle, Cali, Colombia | 2019 – 2023

- Managed and maintained institutional websites using HTML5, CSS, JavaScript, and Joomla.
- Performed regular updates and troubleshooting to maintain website security and minimize downtime.
- Collaborated with non-technical teams to understand needs and translate them into functional improvements.

Achievement: Proposed and developed new responsive designs for the Electronic Engineering, Electrical Engineering, and Technology program websites, integrating them into the institutional site with the communications team.

EDUCATION

Universidad del Valle – Systems Engineering Degree SENA – Software Development Technician

SKILLS

Programming Languages	JavaScript, TypeScript, Java, PHP, C#, Python
Frameworks & Runtimes	Next.js, Node.js, .NET, Angular, NestJS, Spring Boot, Express, Laravel, Yii2, Bootstrap
Databases	PostgreSQL, Oracle, MySQL, MongoDB, Firestore, Supabase
Cloud & Tools	Azure, AWS, Azure DevOps, Postman, Docker, Git, Linux, Jira, Excel, Figma
Requirements & QA	Requirements Elicitation, User Stories, Acceptance Criteria, Functional Documentation, Test Case Design, Functional & API Testing, Scrum
Spoken Languages	English – Proficient (C2), EF SET Certificate (link) · Spanish – Native
